

My name is Fu Chunjiang, I was born in Northern East of China. I studied in ECUST Shanghai for 6 years and Osaka Univeristy for 7 years. Recently I start to work in Honda Research Institute near Tokyo.

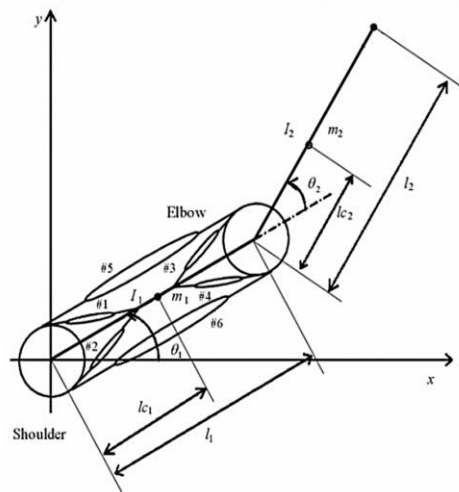

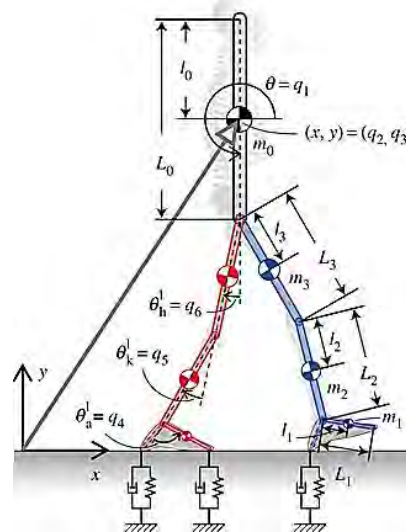

I did some research on human motor control, such as reaching movement impedance and optimal control, walking limit cycle stability and sitting perturbation.

Now I want to learn robotics.

An intermittent control model of flexible human gait using a stable manifold of saddle-type unstable limit cycle dynamics

Chunjiang Fu¹, Yasuyuki Suzuki¹, Ken Kiyono¹, Pietro Morasso²
and Taishin Nomura¹

I like doing some sports,
such as bicycling,
basketball, swimming,
climbing, pingpong, etc.

I like traveling and taking photoes.
This is my first time visiting Italia!
I want to go to so many places,
but only one day is free!

I hope to make new friends here
And let us enjoy winter school!
